American Helicopter Society  
Southwest Chapter presents...

Robert Wetherall  
Program Manager, Aerial Reconfigurable Embedded System (ARES)  
The DARPA ARES Program  
Wednesday, May 20, 2015

Mr. Wetherall has 37 years experience in the Aerospace field. Including configuration design and development of integrated flight hardware for a number of aircraft, including F-111, F-16XL, B-2A, YF-22, F-22, A-330 and X-33, followed by 12 years leading Space Transportation Architecture Studies, Single Stage To Orbit development, Space Launch Initiative studies and Hypersonic Flight Vehicle configuration development. Mr. Wetherall is a recipient of Lockheed Martin’s highest award, the NOVA, for leading the development and demonstration of the Falcon HTV-2.

The DARPA/AFRL Aerial Reconfigurable Embedded System (ARES) Program, a modular, autonomous, multi-role VTOL delivery system is scheduled to fly in late 2015. The ARES vehicle is designed to support multiple missions and enable new and powerful operational concepts.
